

NEWS RELEASE · FOR IMMEDIATE RELEASE

Canadian company launches WebSwitcher AI: real-time voice-to-voice simultaneous interpretation for live events

The #1 AI for simultaneous interpretation. Period. First of its kind in real-time accuracy, voice tone and gender – and first deployed in Canada for Indigenous languages, Canadian French and English.

GLOBAL AUDIOVISUAL (TRYGLOBAL) · WEBSWITCHER AI · PROCOM AUDIO

OTTAWA / MONTRÉAL, Canada – September 10, 2026 – Global Audiovisual (TryGlobal), a simultaneous-interpretation specialist since 1998, today launched WebSwitcher AI: voice-to-voice AI simultaneous interpretation for in-person, hybrid and virtual events. A speaker talks; within seconds the audience hears a natural voice in its own language – with live closed captions.

- **Proudly first of its kind** – real-time accuracy that preserves the speaker's voice tone and gender.
- **First to deploy in Canada for Indigenous languages**, including Inuktitut, alongside Canadian French and English.
- **30+ languages from one device** – into Microsoft Teams, Zoom, in-room infrared/RF receivers and attendees' phones.
- **Hybrid by design** – works alongside professional human interpreters on the same receivers.
- **Turnkey** – hardware, booths and on-site technicians supplied by Procom Audio.

> *"We focused on the details a listener notices – the pause before a name, the tone of a question, the right term for an acronym. Clients tell us it is the best AI interpreter they have heard."*
> ***– Mohammed Moussa, CEO, Global Audiovisual (TryGlobal)***

Security layer – protocols and standards

- **TLS 1.3** transport-layer encryption on every audio, caption and control stream (HTTPS/WSS)
- **AES-256** encryption for media in transit, including encrypted Teams and Zoom channels
- Certificates and cipher suites reviewed and kept current; legacy protocols disabled
- Audio never stored or recorded; client content never used to train AI models
- In-room infrared adds a physical layer: the signal cannot leave the room

About Global Audiovisual (TryGlobal)

Based in Ottawa and Montréal, Global Audiovisual has provided simultaneous interpretation, interpreters and audiovisual production for governments, associations and corporations since 1998. Brands: **WebSwitcher AI** (tryglobal.ai) and **Procom Audio** (procomaudio.com), maker of the ProBooth Lite booth, REX7 receivers and Star infrared system.
